

INDION® RS-F

Resin Selective for Fluoride Description

INDION RS-F is an ion exchange resin designed to selectively remove fluoride from potable water. INDION RS-F performs well, even in the presence of common anions such as chlorides, sulphates.

INDION RS-F can treat potable water having fluorides upto 20 ppm maximum. For optimum performance the influent water should have turbidity 1-2 NTU, organics - nil, TDS < 1500 ppm, total alkalinity < 500 ppm as CaCO₃, Iron and heavy metals < 0.5 ppm.

Storage

Ion Exchange resins require proper care at all times. The resins must never be allowed to become dry. Regularly open the plastic bags and check the condition

of the resin when in storage. If not moist, add enough clean demineralised water and keep it in completely moist condition. Always keep the resin drum in the shade. Recommended storage temperature is between 20° C - 40° C.

Safety

Acid and alkali solutions used for regeneration are corrosive and should be handled in a manner that will prevent eye and skin contact. If any oxidizing agents are used necessary safety precautions should be observed to avoid accidents and damage to the resin.

INDION range of Ion Exchange resins are produced in a state-of-the-art ISO 9001 and ISO 14001 certified manufacturing facilities at Ankleshwar, in the state of Gujarat in India.
