

Description

INDION NSSR is a macroporous strongly basic anion resin which is tailor made to suit removal of nitrate ions from water for potable uses. The proper mix of physico-chemical properties gives ideal nitrate exchange kinetics to this resin making suitable for nitrate removal in the presence of sulphate ions. High concentration of nitrate in water is a potential hazard for two reasons. The nitrate ions form complexes with the blood and in the long run cause oxygen depletion affecting human life. The flow of nitrate bearing water through iron pipes can cause depletion of oxygen leading to corrosion. In view of these difficulties use of an Ion Exchange resin is the preferred process for nitrate removal.

^e ION EXCHANGE

Refreshing the Planet

Characteristics			
Appearance	Opaque off white to brown beads		
Matrix	Styrene divinylbenzene copolymer		
Functional Group	Quaternary ammonium		
Ionic form as supplied	Chloride		
Total exchange capacity	0.9 meq/ml, minimum		
Moisture holding capacity	45 - 55%		
Whole beads	90%		
Shipping weight*	650 - 690 kg/m³		
Particle size range	0.3 to 1.2 mm		
> 1.2 mm	5.0%, maximum		
< 0.3 mm	1.0%, maximum		
Uniformity co-efficient	1.7, maximum		
Effective size	0.40 to 0.55 mm		
Maximum operating temperature	100°C in Cl form		
Operating pH range	0 to 14		
Resistance to reducing agents	Good		
Resistance to oxidizing agents	Generally good, chlorine should be absent		
Osmotic stability	Excellent		
Typical operating data			
Bed Depth	1.0 m		
Backwash	5 m³/ hm² for 5 to 10 minutes		
Regenerant	ΝαCΙ		

Regeneration level	125 kg of NaCl/m³		
Regenerant concentration	5 % - 10% w/v		
Injection flow rate	2 - 4 BV/h		
Slow rinse volume	2 BV		
Slow rinse flow rate	At injection flow rate		
Fast rinse volume	6 BV		
Fast rinse flow rate	At service flow rate		
Minimum flow greater than or equal to	0.082 gpm/ft ^{3} of resin, 0.66 LPH/I of resin 0.66 BV/h		
*Weight of resin, as supplied, occupying 1m ³ in a unit after backwashing and draining.			

Packing

HDPE Lined bags	:	25/50 lts
LDPE bags	:	1 cft/25 lts
Super sack	:	1000 lts
Super sack	:	35/40/42 cft
MS/HDPE drums with liner bags	:	180/200 lts
Fiber drums with liner bags	:	7 cft

Storage

lon exchange resins require proper care at all times. The resin must never be allowed to become dry. Regularly open the plastic bags and check the condition of the resin when in storage. If not moist, add enough clean demineralised water and keep it in completely moist condition. Always keep the resin drum in the shade. Recommended storage temperature is between 20°C and 40°C.

Safety

Acid and alkali solutions used for regeneration are corrosive and should be handled in a manner that will prevent eye and skin contact. If any oxidising agents are used, necessary safety precautions should be observed to avoid accidents and damage to the resin.

CONFORMANCE STATEMENT: This product conforms to NSF / ANSI Standard 61 and is certified with GOLD SEAL from WQA

INDION range of lon Exchange resins are produced in a state-of-the-art ISO 9001 and ISO 14001 certified manufacturing facilities at Ankleshwar, in the state of Gujarat in India.
